

WinGuard expertise. From concept to operation.

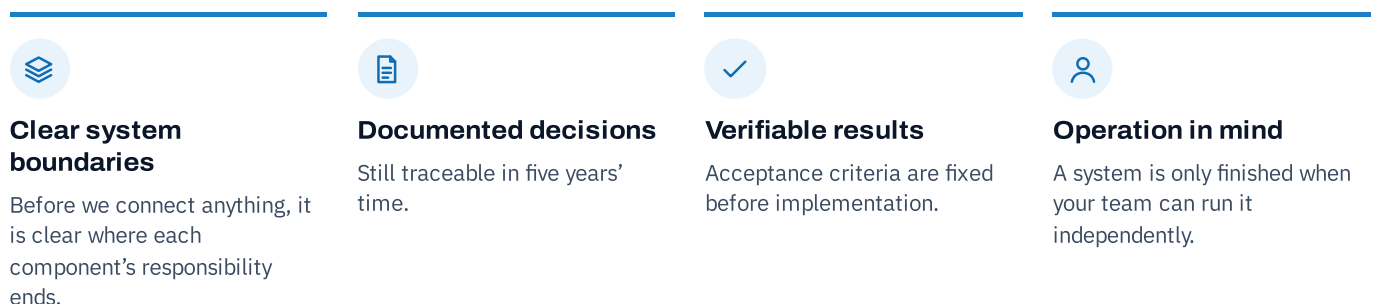

One point of contact, from the first question to day-to-day operation.

WHERE YOU START

WHAT YOU CAN MEASURE US AGAINST

WHAT YOU GET IN CONCRETE TERMS

01 · CONSULTING & PLANNING

A verifiable basis.

- ✓ System and version overview
- ✓ Requirements and interface scope
- ✓ Server, network and redundancy concept
- ✓ Acceptance criteria and expansion outlook

02 · INSTALLATION & INTEGRATION

Interfaces that work together.

- ✓ Installation and configuration of WinGuard
- ✓ Data points, graphics and event assignment
- ✓ Response procedures and operator rights
- ✓ Functional test and traceable acceptance

03 · MIGRATION & EXTENSION

Change, with a fallback plan.

- ✓ Record starting version and dependencies
- ✓ Check drivers, modules and licensing
- ✓ Plan backup, testing and switchover sequence
- ✓ Fallback, final check and documentation

04 · MAINTENANCE & SUPPORT

Faults along the chain.

- ✓ Check system status and logs
- ✓ Narrow down faults from subsystem to operator
- ✓ Prepare updates under control
- ✓ Maintenance scope, availability and escalation

05 · TRAINING & DOCUMENTATION

People who operate with confidence.

- ✓ Practise event sequences with examples
- ✓ Explain operator roles and responsibilities
- ✓ Teach administration and upkeep tasks
- ✓ Document system decisions

06 · CAD & VISUALISATION

Plans that provide orientation.

- ✓ Check existing plans (DWG, DXF, DGN)
- ✓ Clean up layers, rooms and labels
- ✓ Define graphics and navigation structure
- ✓ Check detector assignment and display

 **AIM** Keep identities in sync across several access control systems

✓ Every service **can be commissioned separately**

MIGRATION IN SIX STEPS · ONE WAY BACK

Where does your system stand today?

Simone Rose (CTO) and Emanuele Rose (CEO), Advancis training on WinGuard X4 and X5. Reply usually within one working day.
